

Send your contributions before April 30 for the LPWAN & 5G conference organized by L'Embarqué on June 24

For its 5th edition, the LPWAN conference, which now bears the name **LPWAN & 5G**, as the arrival of 5G will disrupt the field of long-range and low-power networks for the Internet of Things, will take place on June 24, 2021 in Paris, face-to-face and remote.

Four or five high-level presentations will be held in the morning and will be followed in the afternoon by two thematic routes: one focused on technological developments and advances in the standardization of technologies, the other on feedback and applications conducted with LPWAN and 5G networks (smart city, smart energy metering, geolocation, etc.). During the day, an exhibition space dotted with small stands will give speakers and listeners the opportunity to meet certain players in the field (technology suppliers, card and module manufacturers, network operators, design offices, etc.).

The LPWAN & 5G conference will focus on answering the following questions:

- How are the different LPWAN solutions available today (LoRa, Sigfox, LTE-M, NB-IoT, 5G, etc.) and emerging ones (Eltres, Mioty, Wi-Fi HaLow, Wirepas, Zeta, etc.) ? And how they can work in cooperation ?
- What are the main technological and normative developments facing public and private LPWAN operators, whether they operate in frequency bands accessible without a license or in licensed bands?
- What are the next expected evolutions for the LPWAN protocols that we know today?
- How do and will LTE-M, NB-IoT, 5G cellular solutions fit together in this context?
- Will the arrival of solutions based on constellations of satellites change the sector? In this context, a call for contributions is open until April 30, 2021.

The summaries of the presentations, whether they come from suppliers of hardware or software technological bricks, standardization bodies, operators or users of LPWAN networks, cloud platform publishers or applied research labs, should not exceed one page and should be sent to the following address: redaction@lembarque.com.

Proposals will be reviewed by L'Embarqué editorial staff for approval. You can visit the LPWAN & 5G showcase maintained by L'Embarqué on [the social network LinkedIn to follow the latest news in the field of LPWAN networks](#) and get the details to come on the conference.

A website dedicated to the conference with registration procedures (limited number of face-to-face places and paid participation) will be put online during the first week of May.
